Forest Bioeconomy

MSc with a major in Bioeconomy Management

Do you want to explore the forest's key role in a sustainable bioeconomy? Gain expert knowledge about the forest industry and its sustainability potential. The master's programme in forest bioeconomy opens doors to careers in forestry, consulting, and more.

Two programmes - one goal

- Both Master programmes are focusing on the use and reuse of sustainable biobased materials with a focus on the forest value chain, its production and connection to societal demand of products.
- The courses in the programmes are based on different learning methods, combine general skills with expert knowledge, and are closely connected to the biobased sector and its actors.
- Both Master's programmes are well integrated in the forest sector and aim to open doors to careers in the forest sector, consulting, and more in Sweden and abroad.

3. SLU: Campus Ultuna and its Environment

SLU and campus Ultuna

aim to provide a

- rich student life
- a nice learning environment with closeness to teachers and researchers
- opportunity to network
- possibility to enjoy nature

Our surroundings: Ultuna and Uppsala

- Ultuna Campus
 - Located in southern Uppsala
 - Close to nature
 - Easy to reach by public transportation
- Student life in Uppsala
 - Many attractions and things to do
 - Unions and festivals

Industry collaboration and networks

Close connection to the Forest Industry sector through:

- Advisory Board and its members from different organizations
- Guest lectures
- Study visit
- Internship
- Master thesis

Thank you!
