# What exactly is Mentimeter?

With Mentimeter you can build interactive presentations with an easy-to-use online editor, directly from your browser.
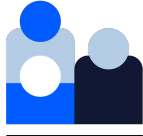

Add questions, polls, quizzes, slides, images, gifs and more to your presentation to make them more engaging and fun.

When you present, your audience uses their smartphones to connect to the presentation where they can answer questions, give feedback and much more. Their responses are visualized in real-time, creating a unique and interactive experience.

Once your Mentimeter presentation is over, you can share and export your results for further analysis and even compare data over time to measure the progress of your audience and sessions.
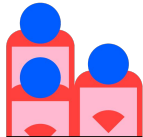

# Mentimeter

# How & Why Mentimeter enhances the student and learning experiences

Keeps the dialog fresh and going by engaging all participants at the same time

It can be used as a learning and as an assessment tool

Anonymity draws out even the most shy participants and make the most hesitant people talk

Everyone is given a voice. Everyone is heard. You no longer need to worry that people are being left out

Breaks the static "sitting there and listening", by creating a new communication channel

The interaction helps to boosts collaboration in group assignments

Using different interactive elements like the quiz is the key to innovation, progress and creativity

Very intuitive and suitable for all type of collaborative student assignment
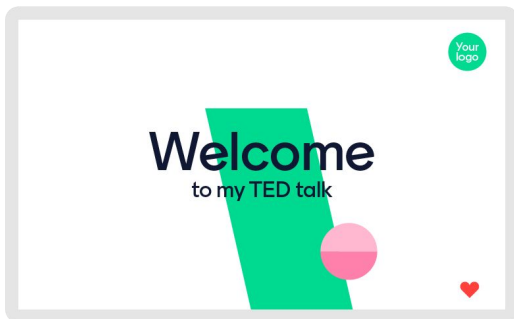

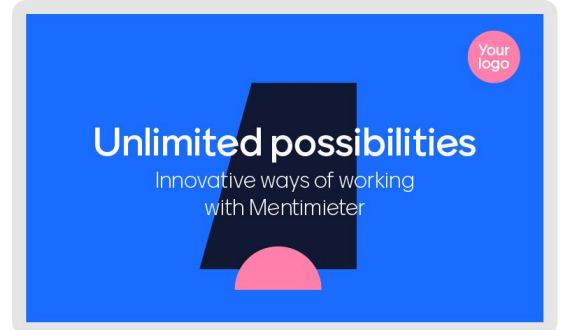

# Various use case examples

- Use it for class assignments that allow for a presentation

- Use it in student union activities to improve the engagement and to make sure that everyone is heard

- Use it in group projects to gather expectations, brainstorm ideas and share feedback

- Use it in research projects to gather input and to document and compare results over time

- Energize and make your presentations more fun by using the Quiz competition

- Allow your audience to ask you questions, through the Q&A feature

- Use Mentimeter's content slides to present content in a new, modern and interactive way

- Use it as an ice-breaker to check how your audience are feeling or what their opinion on a specific topic is

- Use it to evaluate your presentations in order to become an even better presenter
